# Virtual Multi media Contact Center

GM24

www.expotechinc.com

# Value to IT

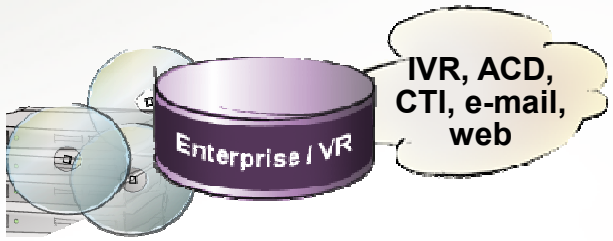

- Deployment
  - Deploy software on standard hardware
  - Reduce Professional service fees
  - Easily deploy work-at-home agents

- Management
  - Administer all sites from anywhere
  - Centralized reports across sites & media
  - Reduce support/license fees

- Development
  - Same tool for IVR, ACD, CTI, e-mail, web
  - Easy integration with enterprise databases
  - **No custom CTI links and CRM APIs**

ExpoTech Confidential

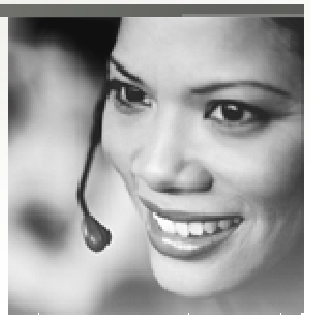

**Slide 6**

**GM24** 1. This is the idea, but the better implementation. Basically, the software is being dispersed over the internet, to the at-home agents. Is there a way to have the call center photos be sort of transparent so you can see the house behind them?
2. Combine the guy with the folders (no calculator and make them all the same colro) and have him connected to all the sites.
3. Need collage of app. development, their database and Internet cloud
Gillian Montgomery, 1/25/2006

# Virtual contact center values

- Get more out of CSRs
  - Reduce call handle times
  - Deploy work-at-home agents

- Adapt quickly to the business
  - Move, expand, open centers
  - Respond to opportunities, disasters, etc.
  - Reprioritize customers in queue

- Improve customer service
  - Route customers using VS2 data
  - Route calls based on conditions

ExpoTech Confidential

# Value to Insurance Clients

- Adapts to insurance business
  Distributed IP architecture. Agents anywhere.

- productivity
  - Management Tool.
    Screen pop.

- Routing flexibility
  CTI Built-In. Conditional routing workflow.

- Quick deployment
  Standards-based, software-only,
  IP architecture.

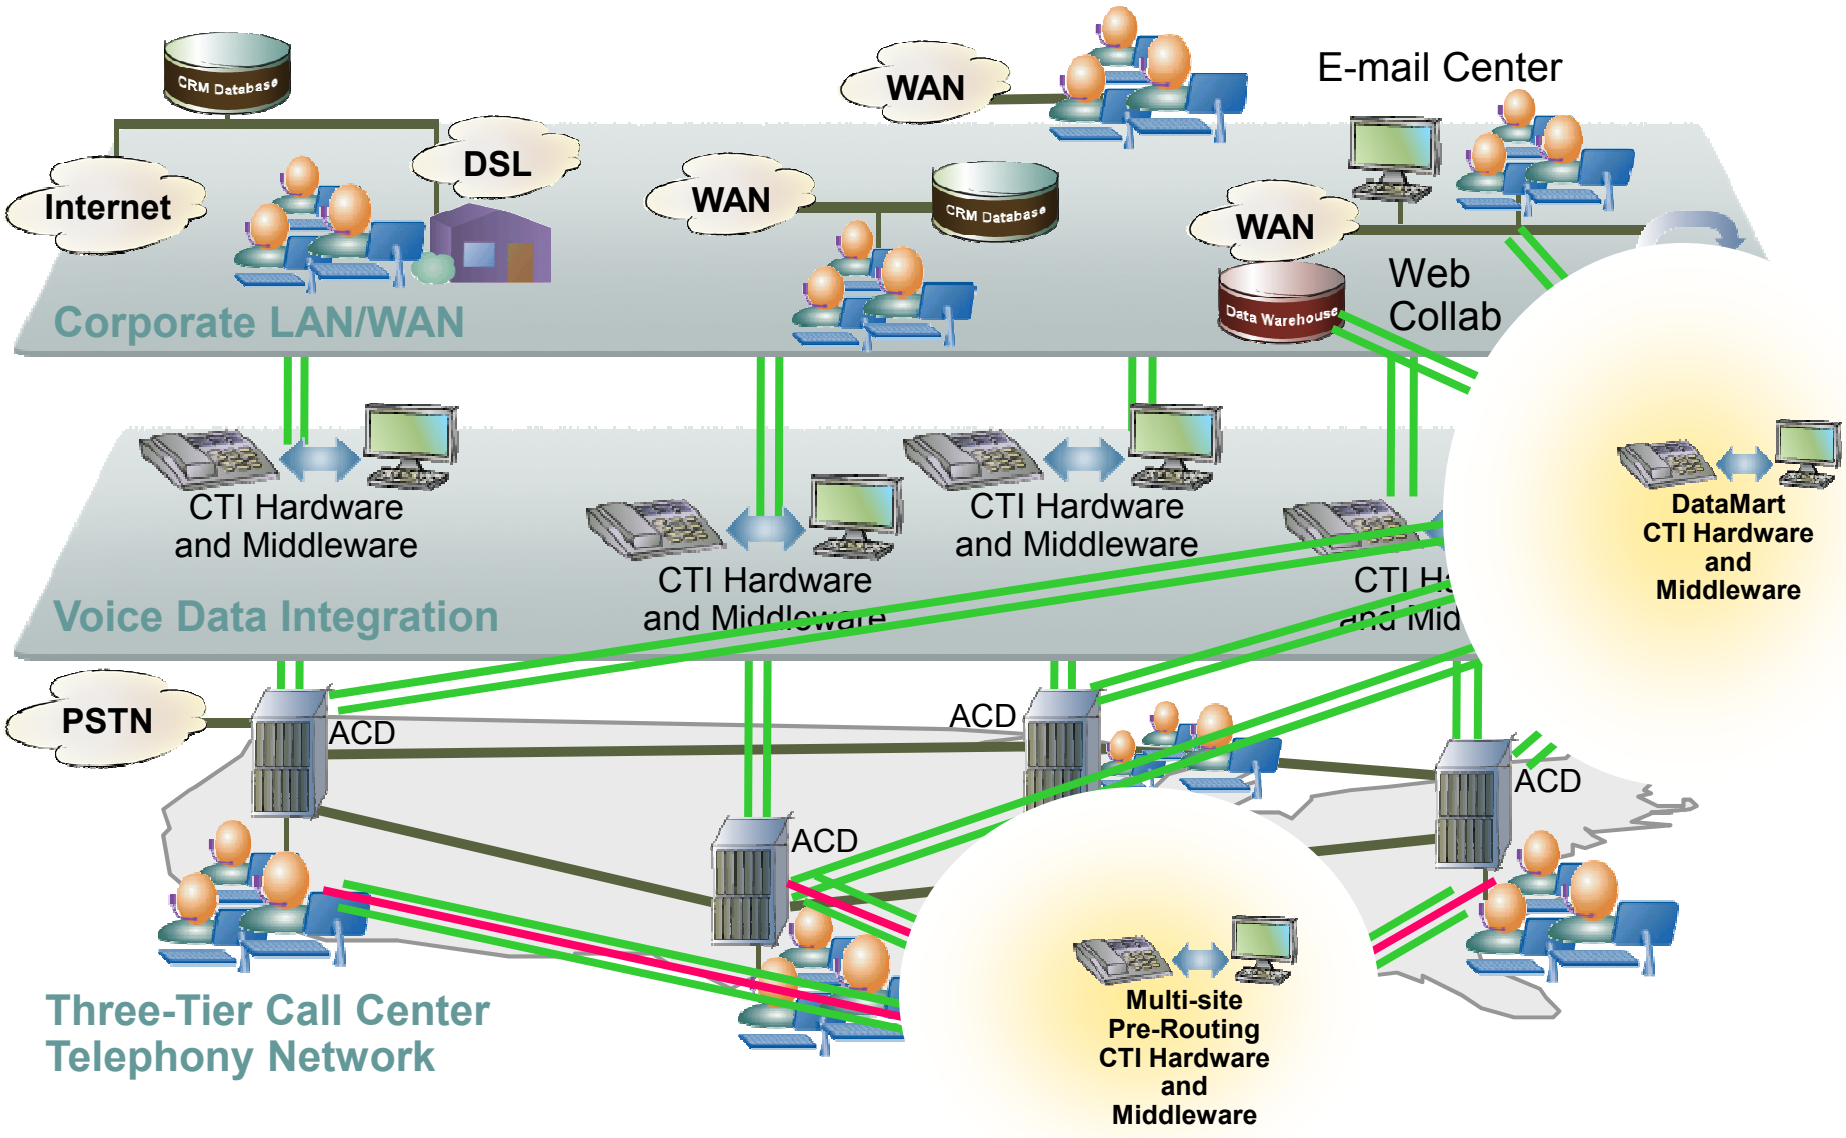

- Business continuity
  Automatic call re-direct.
  No single point of failure.

# Traditional Call Centers

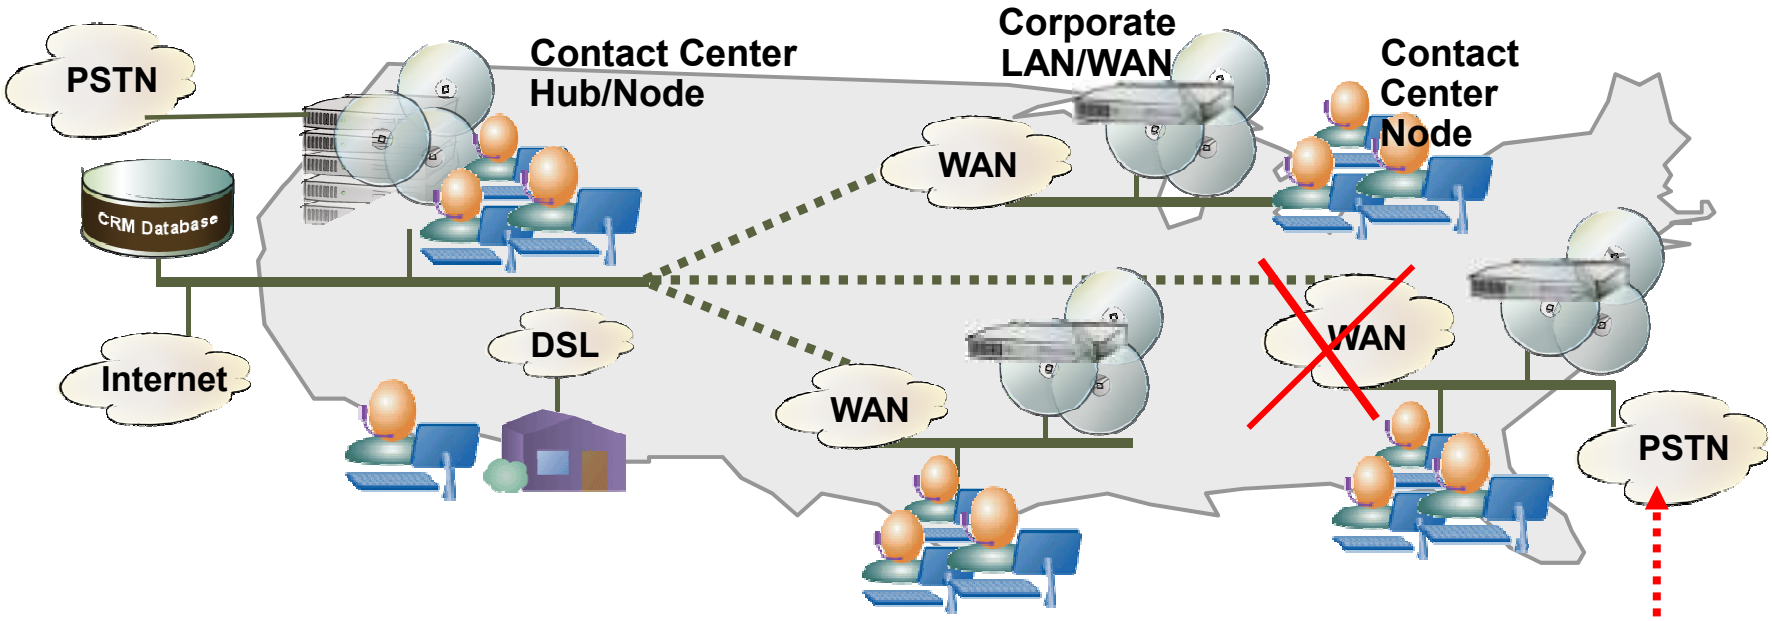

## Two Networks—Phone Centric and Expensive

www.expotechinc.com

www.expotechinc.com

# Business continuity

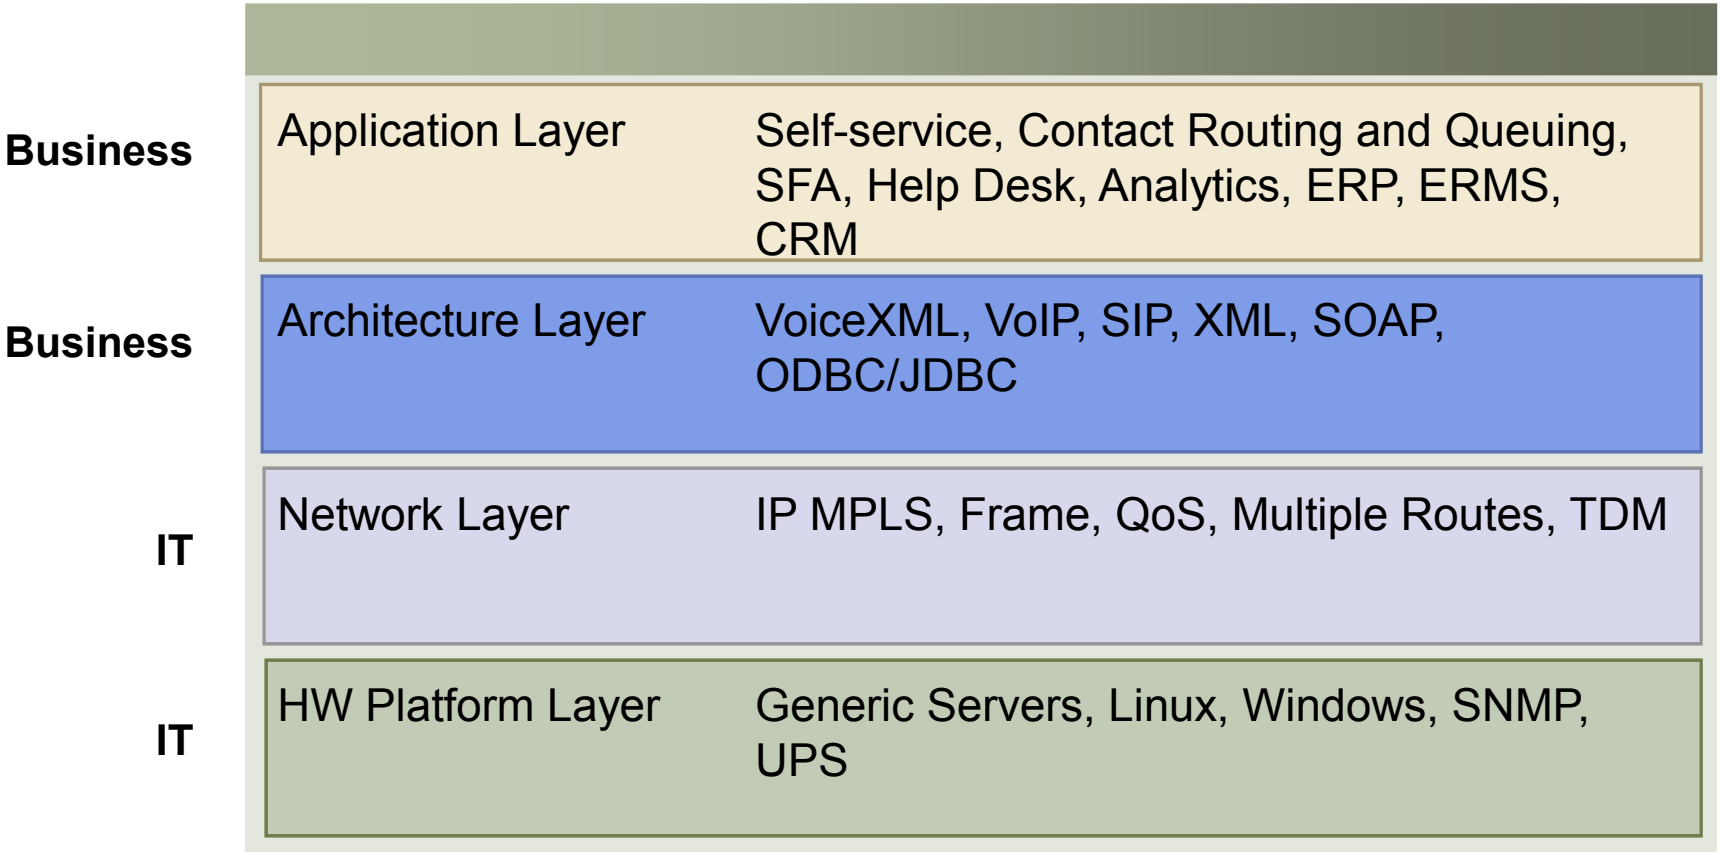

- Multi-media on one platform
  - Consistent routing workflows
  - Consolidated reports
- Multi-site networking
  - Best-agent routing across the enterprise—agents anywhere
  - Single point of admin
  - Consolidated reports
- Converged network
  - IP contact center solution—VoIP
  - Major cost reductions to operations
  - CTI Built-In—CRM integrations within hours not weeks or months
- Standards based – Open architecture

# Virtual Contact center

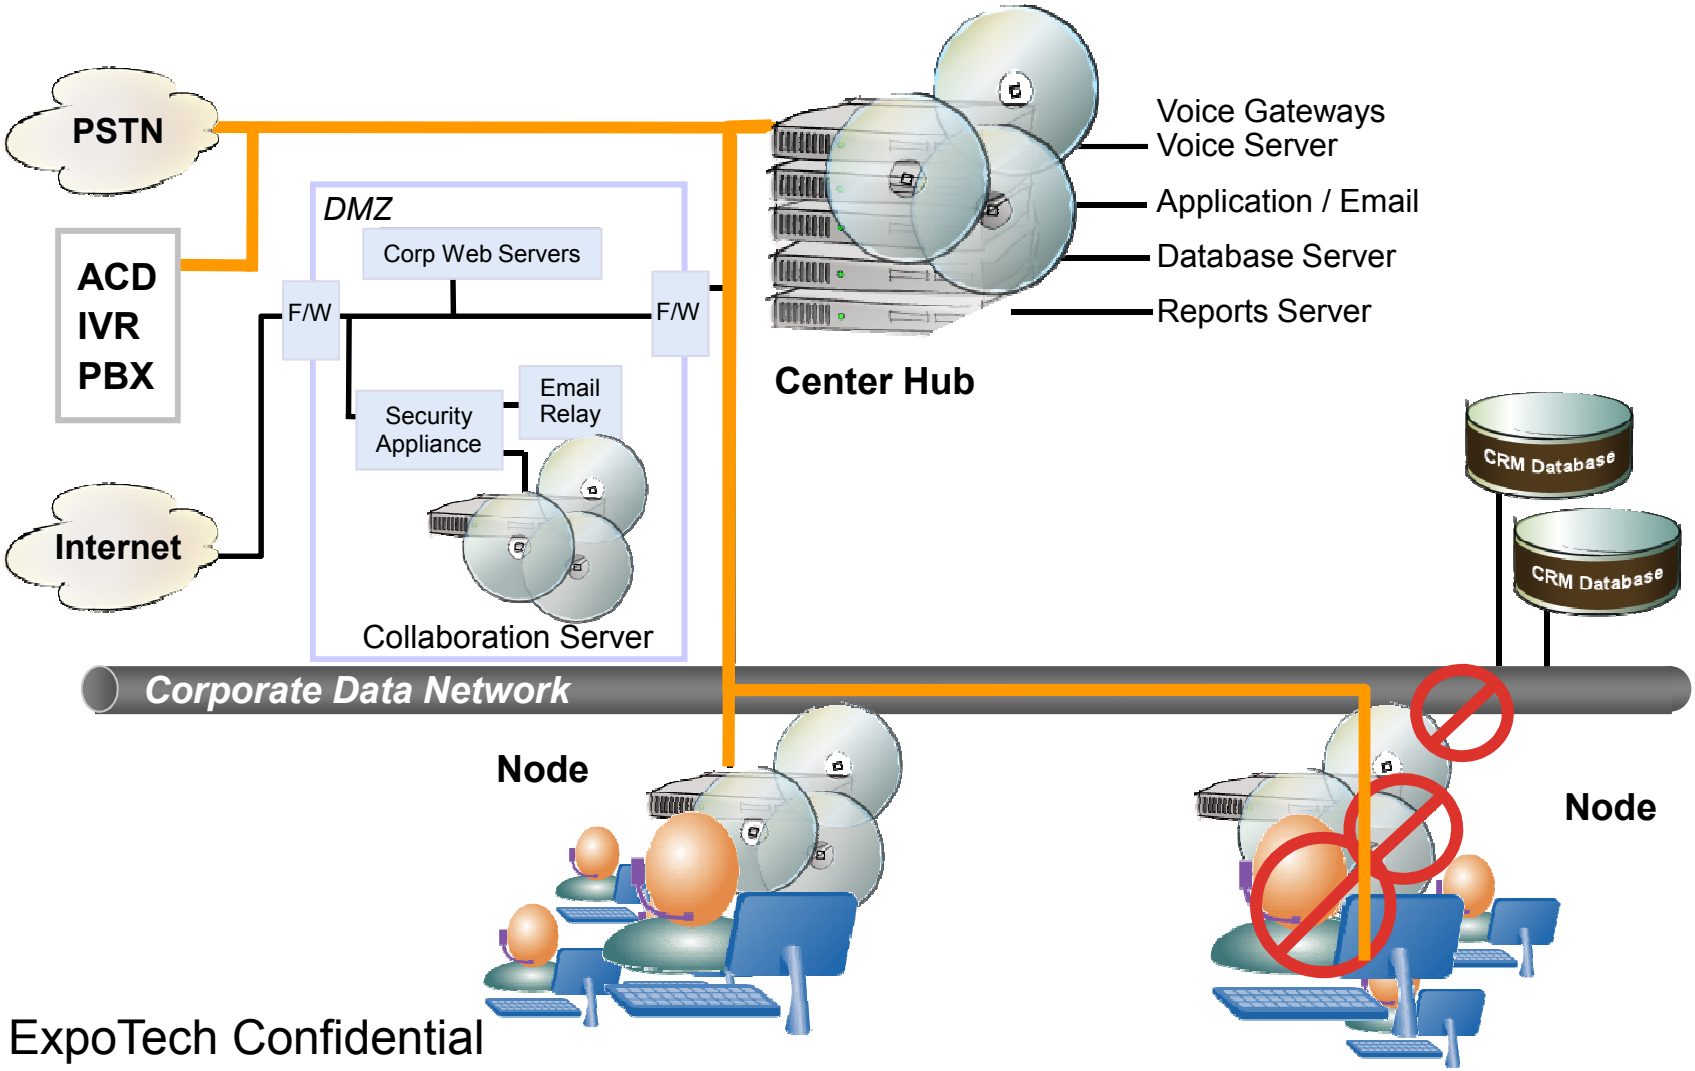

**VoIP isn't the answer; VoIP is the enabler**

www.expotechinc.com

# Contact Center

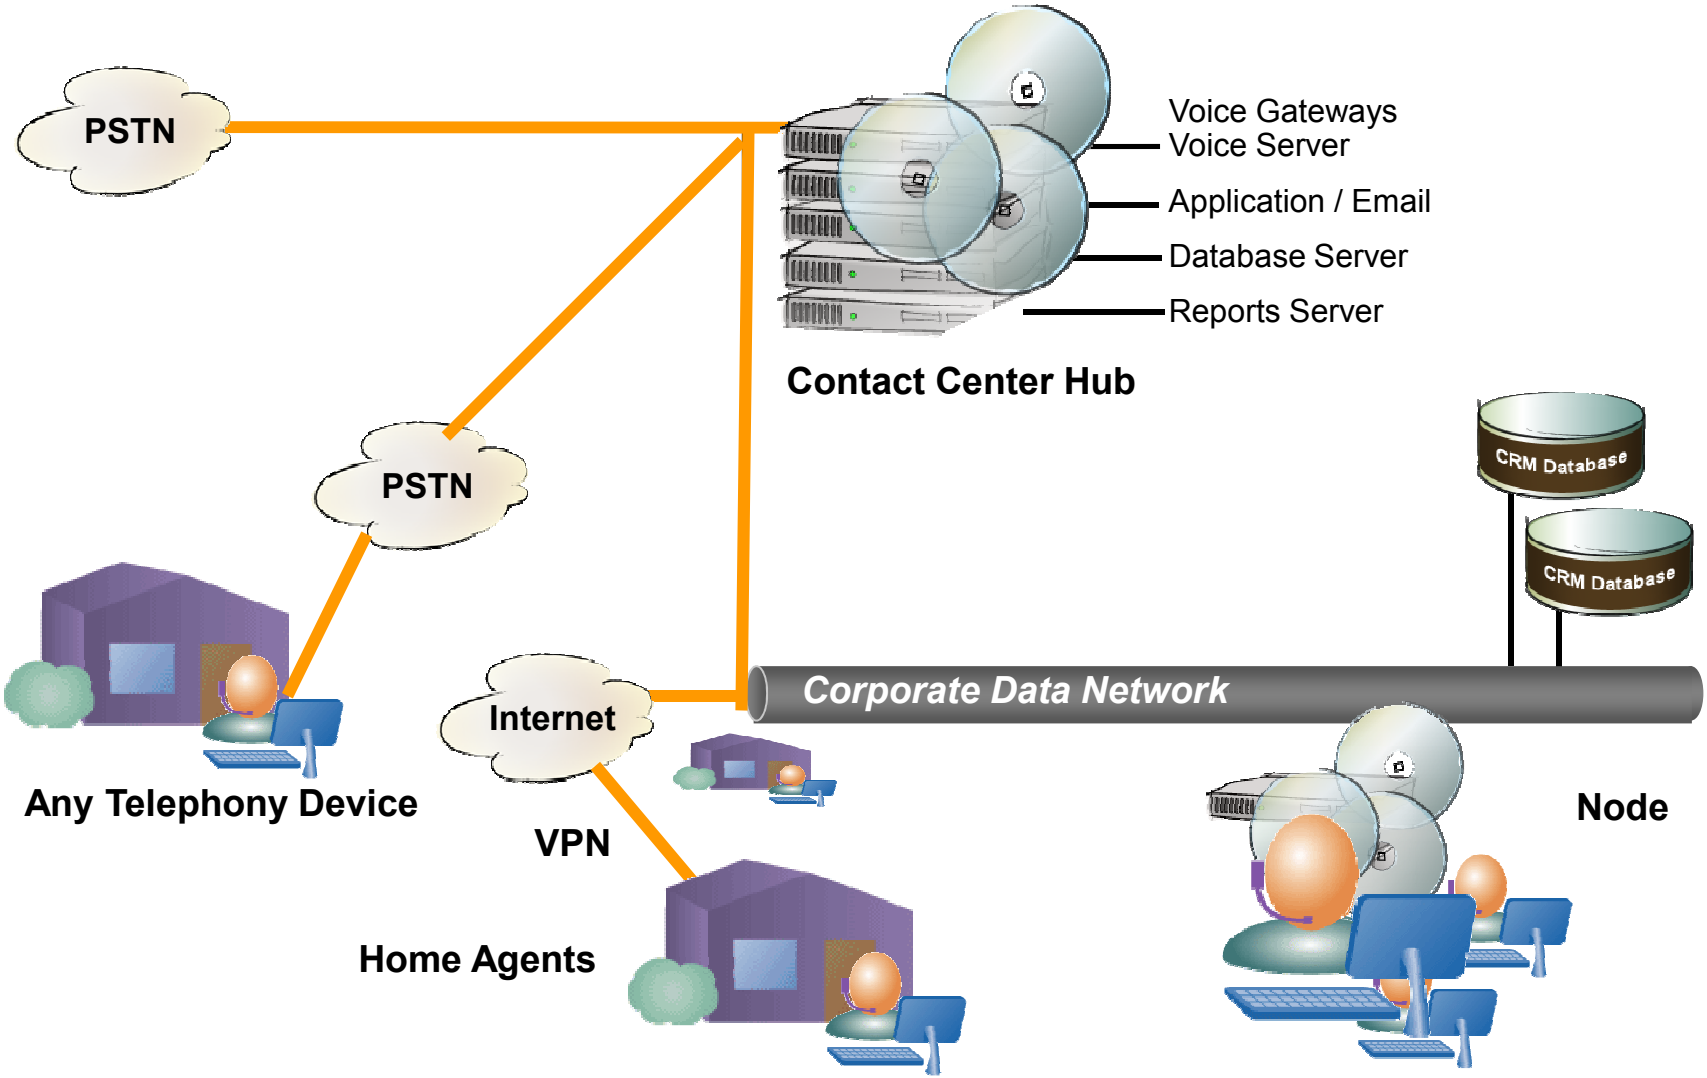

## Mission-Critical Reliability on One Network

ExpoTech Confidential

# Home Agent Support

## Regardless where the agent may be

www.expotechinc.com

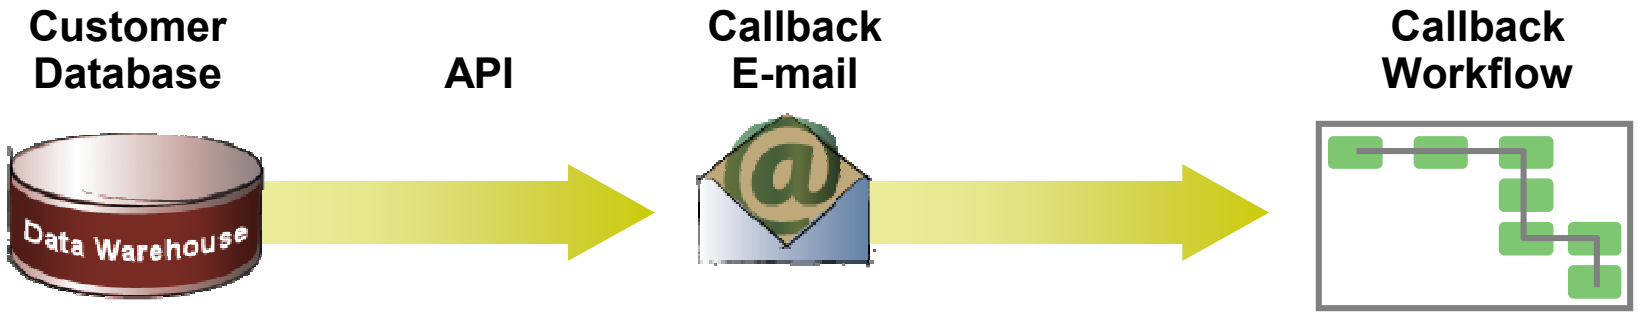

# Multi-Media
## Single Platform on One Network

- Intelligent routing and queuing of mixed media
- One interface
- Consolidated system management – one workflow engine, one database
- Consolidated reporting
- Set response levels for e-mail as with voice
- Screen pop for all media – no CTI required

www.expotechinc.com

# Dialing Campaigns or Surveys

- Preview dial campaigns blended with other inbound customer contacts
- Prioritize according to business rules
- Full reporting, including service levels and agent statistics
- Generate campaigns on-demand or automatically based on call center conditions
- Create callbacks from any corporate information repository

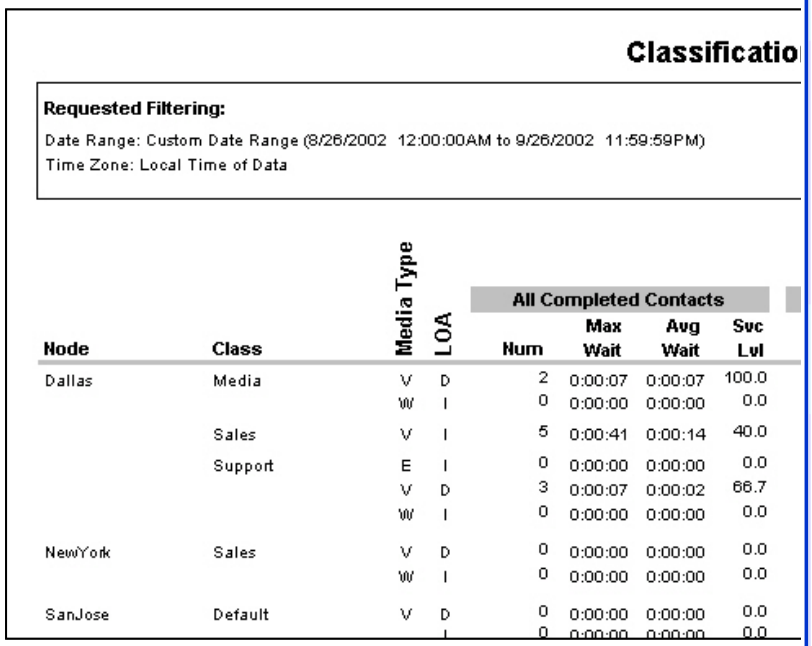

ExpoTech Confidential

# Centralized reporting, One View for all sites and media

## Real-time and Historical Management Information

www.expotechinc.com

- company will have more data available for better decisions than your call center. All agents. All media. All sites. All customer service models.
- Accessible from anywhere.

# CTI Built-In

## Lower Deployment Costs

- One network eliminates the need for costly CTI deployments
  - No CTI hardware or middleware
  - No support and maintenance fees for CTI
  - Screen Pop and Data Directed Call Routing deployed in a few hours, not weeks or months
  - No costly integration changes every time there's a change
- Extends the investment in Expo2 and other applications

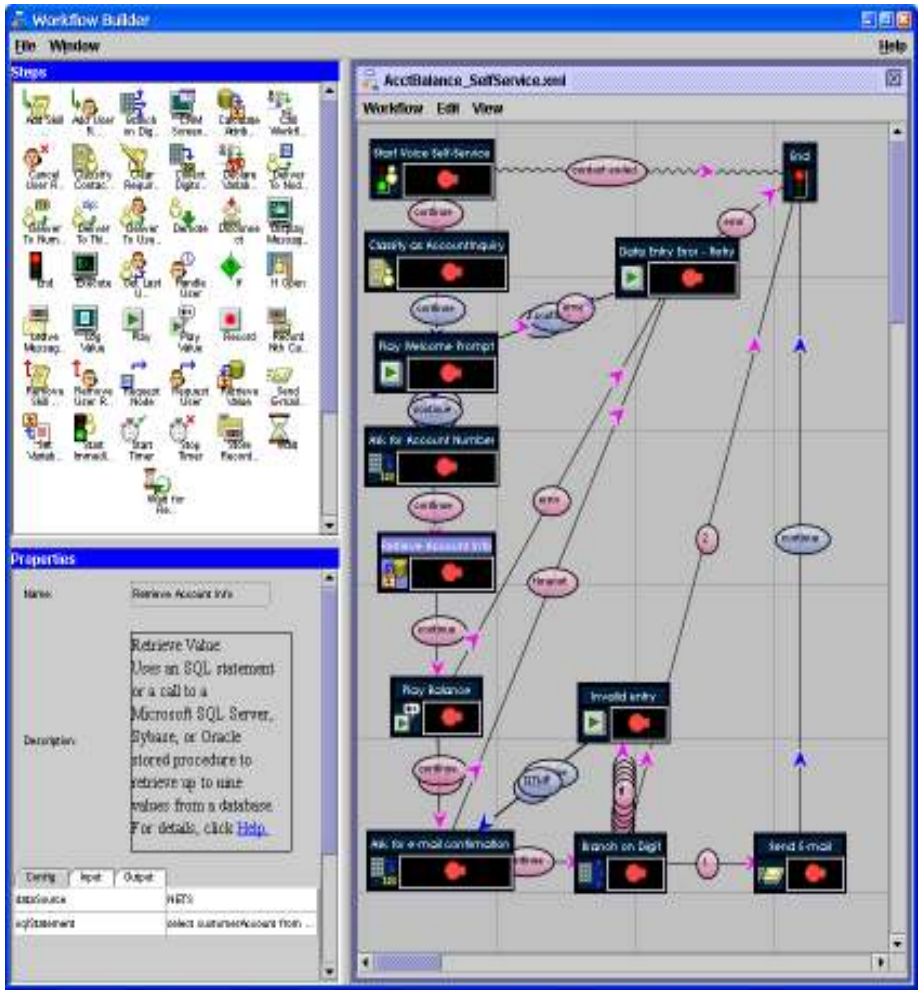

# Auto Attendant and IVR

www.expotechinc.com

- Auto-attendant and IVR
  - Ability to access enterprise data like Expo2 and mainframe applications
  - Caller prompting and menu trees using DTMF
  - Digital announcements and music-on-hold while waiting in queue
  - Enables incoming calls with Expo2 or Mainframe using DTMF VoiceXML 4.0 standard platform for advanced applications
  - Integrate via SIP protocol

# Workflow tools Enterprise Applications

- Open Architecture
- User and field configurable Field configurable means many new features
- Workflows can access databases over JDBC, SOAP, etc.
- Workflows can execute any Java code
- Very extensible

www.expotechinc.com

# Full IVR capabilities

- Play announcements
- Capture DTMF
- DB Access
- Extensible through Java
- Everything except Text To Speech and Speech Recognition
- Voice integration Rich call-recording capability
- Record by classification or randomly
- Agent-initiated recording
- Supervisors can record while monitoring
- Recordings stored centrally and associated with CDRs for search and retrieval
